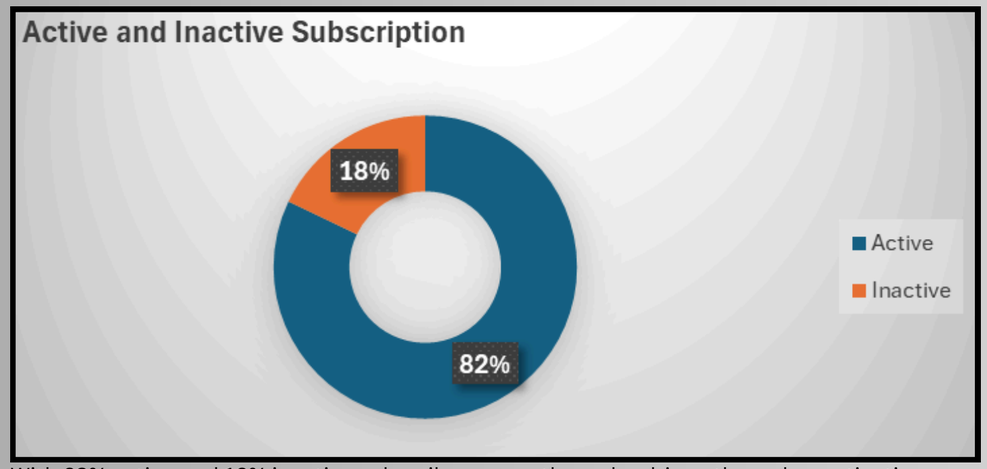
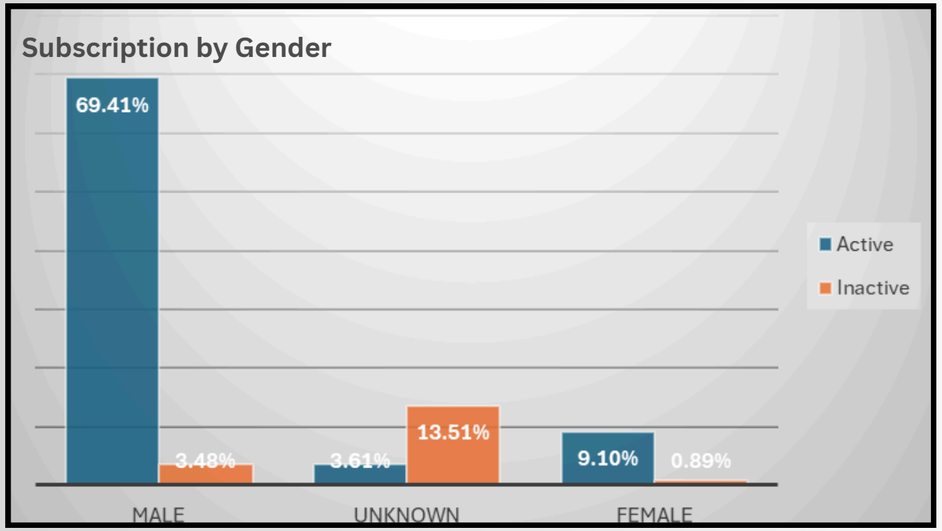
Bright TV Subscription Analysis

Rhirhandzu Ngobeni

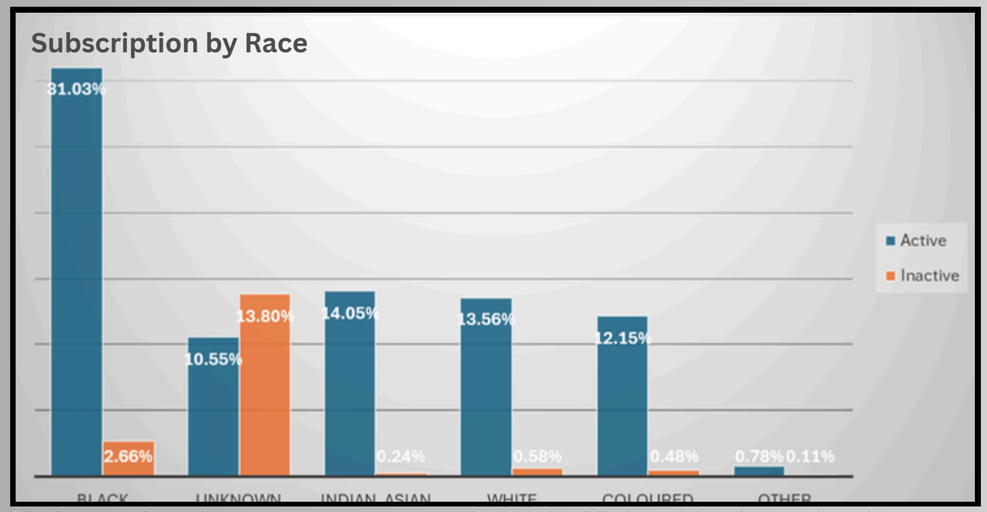
Subscriber Engagement & Profile-Driven Viewing Patterns



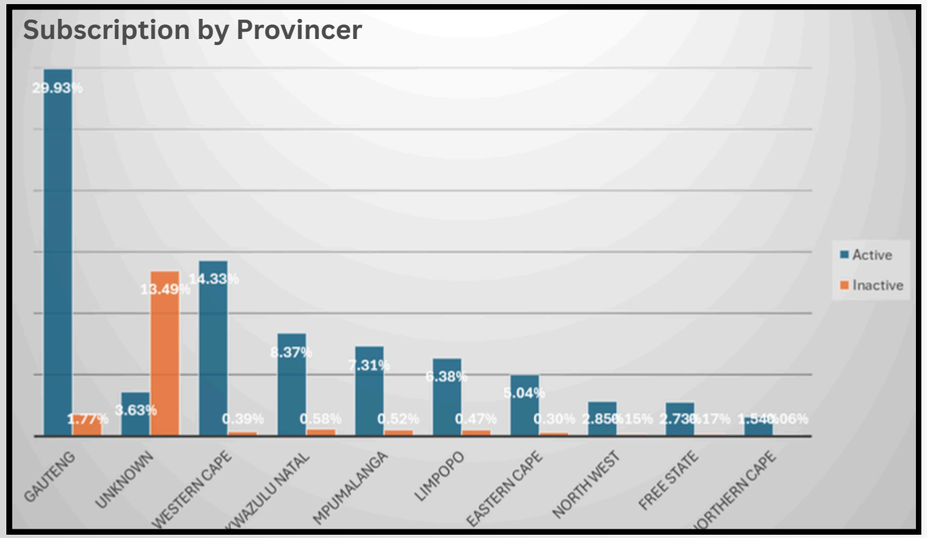
With 82% active and 18% inactive subscribers, growth can be driven through reactivation over acquisition.



Active users are mostly male (69.41%), while inactivity is concentrated among users with unknown gender (13.51%), signaling potential data quality issues.



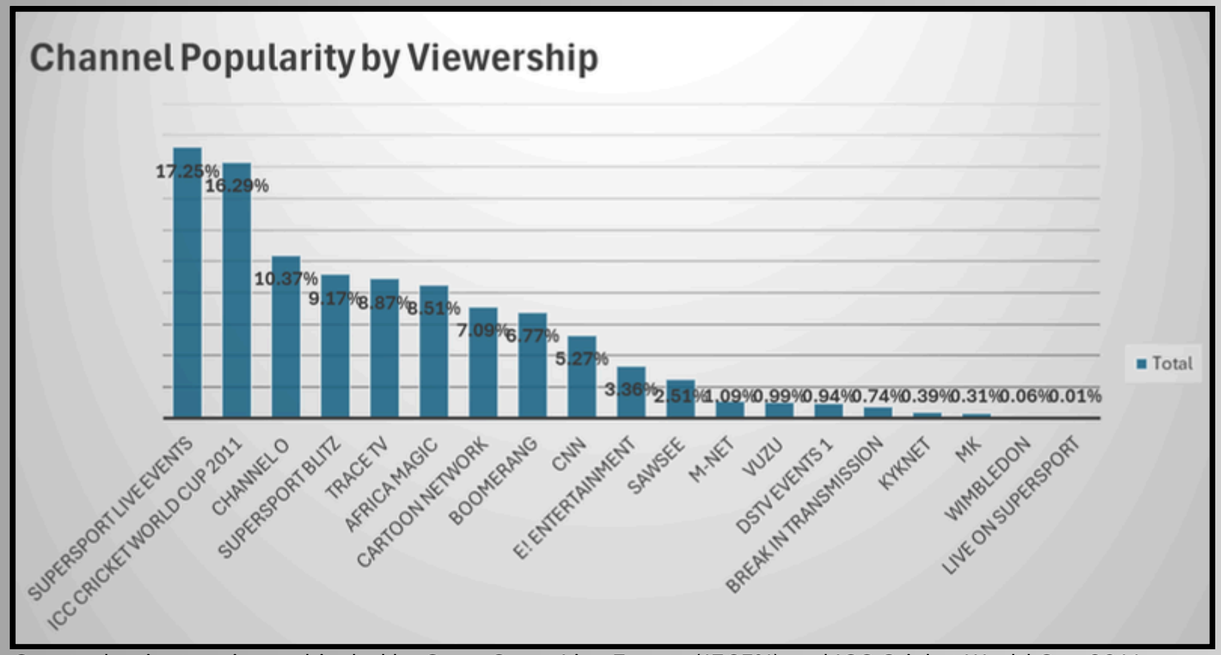
Black users show the strongest engagement (31.03%), while inactivity clusters in unknown profiles (13.80%), highlighting data gaps.



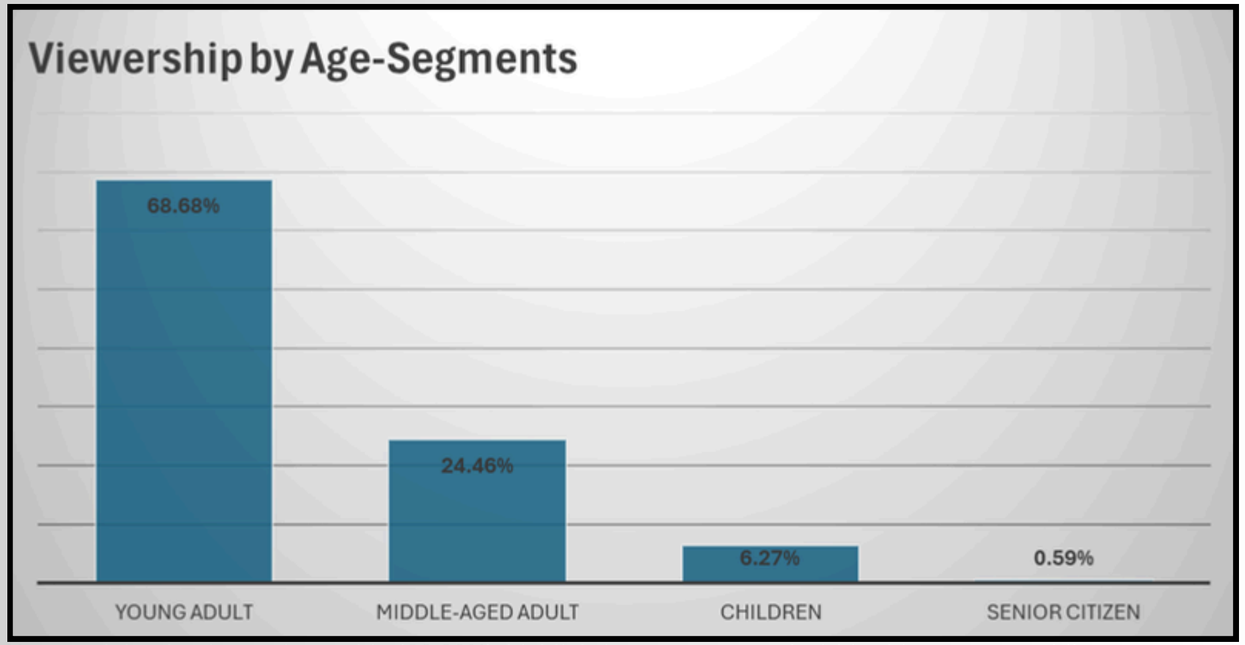
Strong engagement is centered in Gauteng (29.93%), while unknown-province users dominate inactivity, pointing to significant data quality issues.

Bright TV engages a strong core audience (82% active), but inactivity is concentrated among users with incomplete profiles, pointing to onboarding and data quality improvement opportunities.

Viewership Overview: Channel Popularity and Audience Age Segments

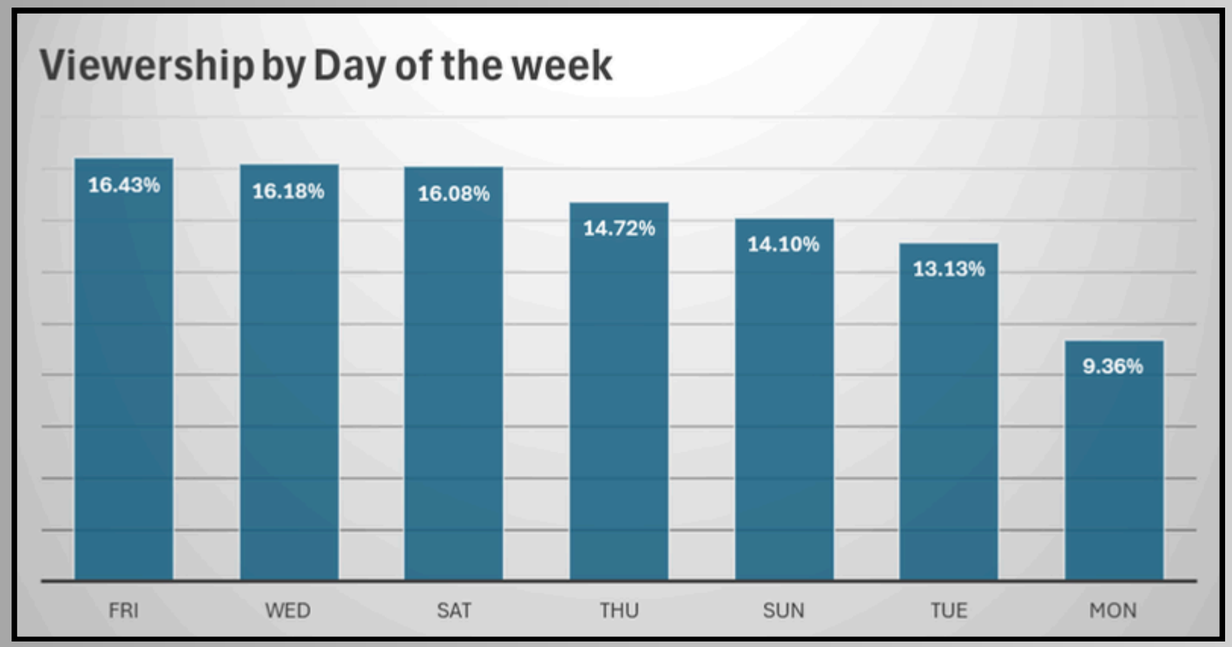


Sports dominates viewership, led by SuperSport Live Events (17.25%) and ICC Cricket World Cup 2011 (16.29%), with minimal engagement from Wimbledon (0.06%) and Live on SuperSport (0.01%).

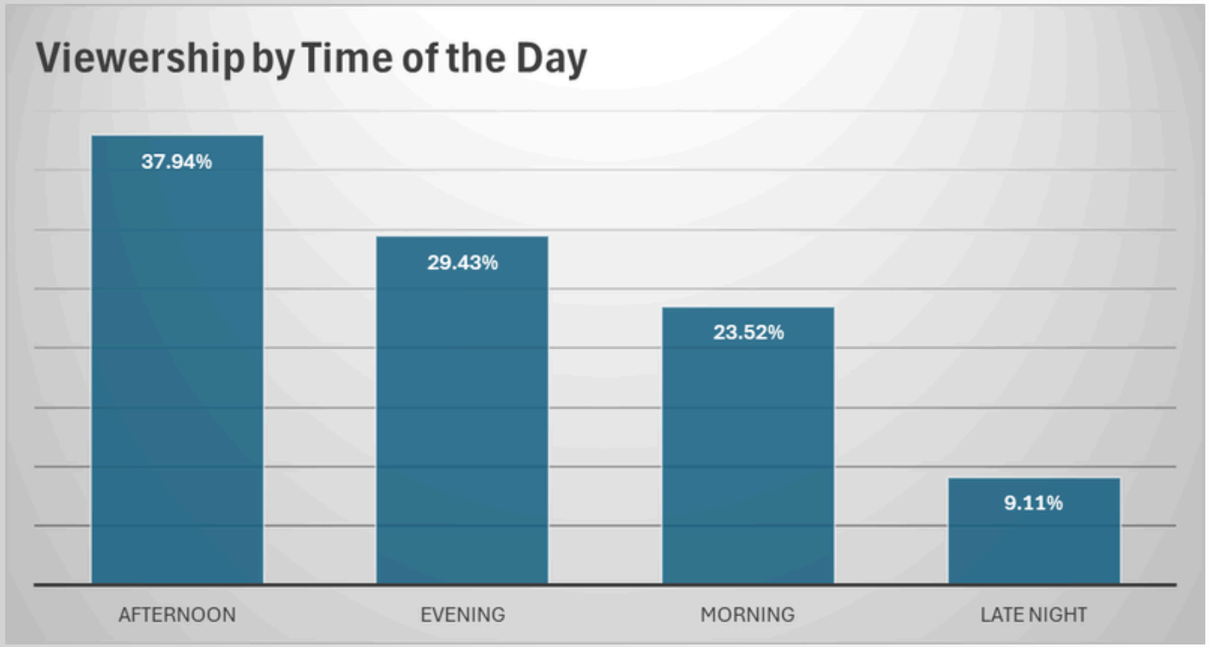


Young adults dominate viewership (68.68%), highlighting strong appeal within this segment, while engagement among senior citizens remains minimal (0.59%).

Viewership Overview: Time | Day of the week and Time of the day



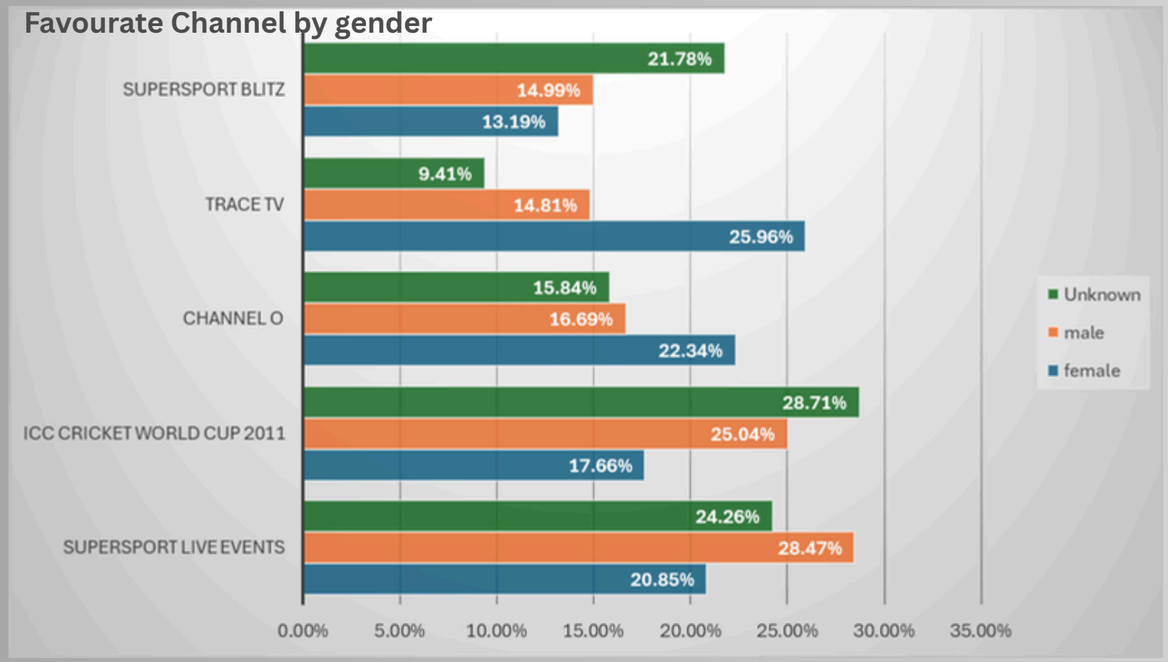
Viewership peaks towards the end of the week, with Friday (16.43%) and Wednesday (16.18%) leading, while Monday (9.38%) shows the lowest engagement, indicating a strong mid-to-late week consumption pattern.



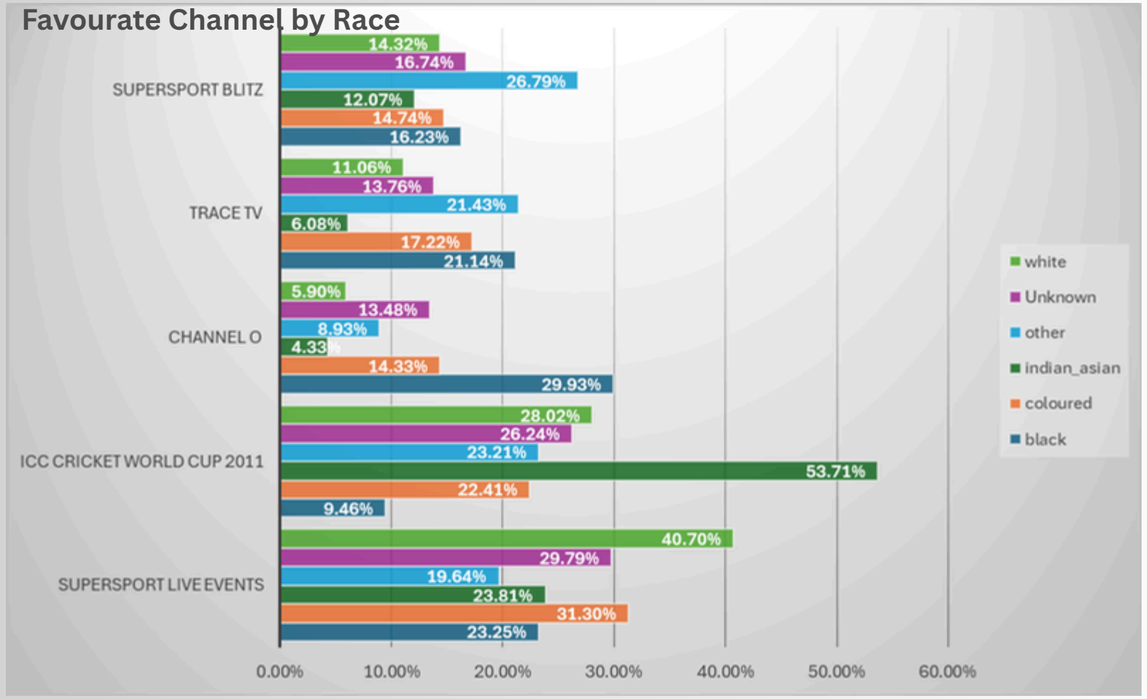
Viewership peaks in the afternoon (37.94%), while late night (9.11%) has the lowest engagement, indicating strong daytime consumption and minimal overnight activity.

Bright TV viewership is driven primarily by sports content, with strong engagement from young adults and clear consumption peaks during the afternoon and mid-to-late week. In contrast, late-night viewing and niche content show minimal engagement, indicating that audience behaviour is highly concentrated around popular live events, specific time windows, and a core demographic segment.

Channel preference Across Key Demographics

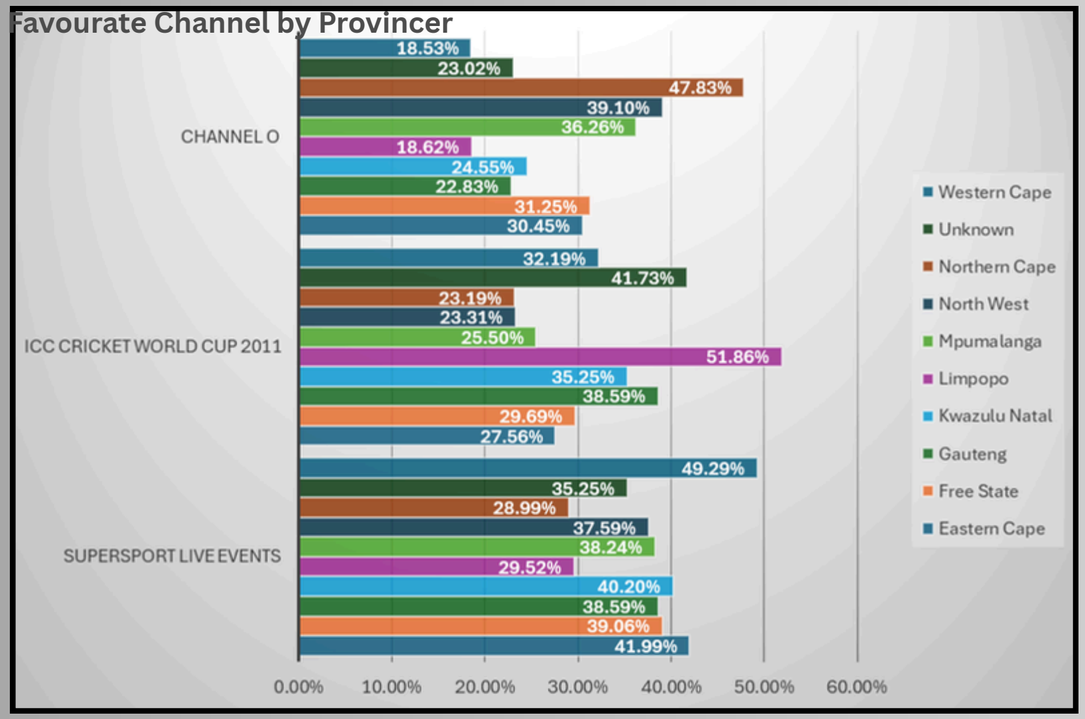


Sports viewership is male-dominated, led by SuperSport Live Events and ICC Cricket, while entertainment channels skew female. High engagement from unknown users highlights a key data quality gap.



Sports channels show distinct racial skews—SuperSport Live Events over-index among white and coloured audiences, while ICC Cricket is driven by Indian/Asian viewers—whereas entertainment channels attract more diverse, predominantly Black audiences. “Unknown” segments indicate data gaps limiting full audience visibility.

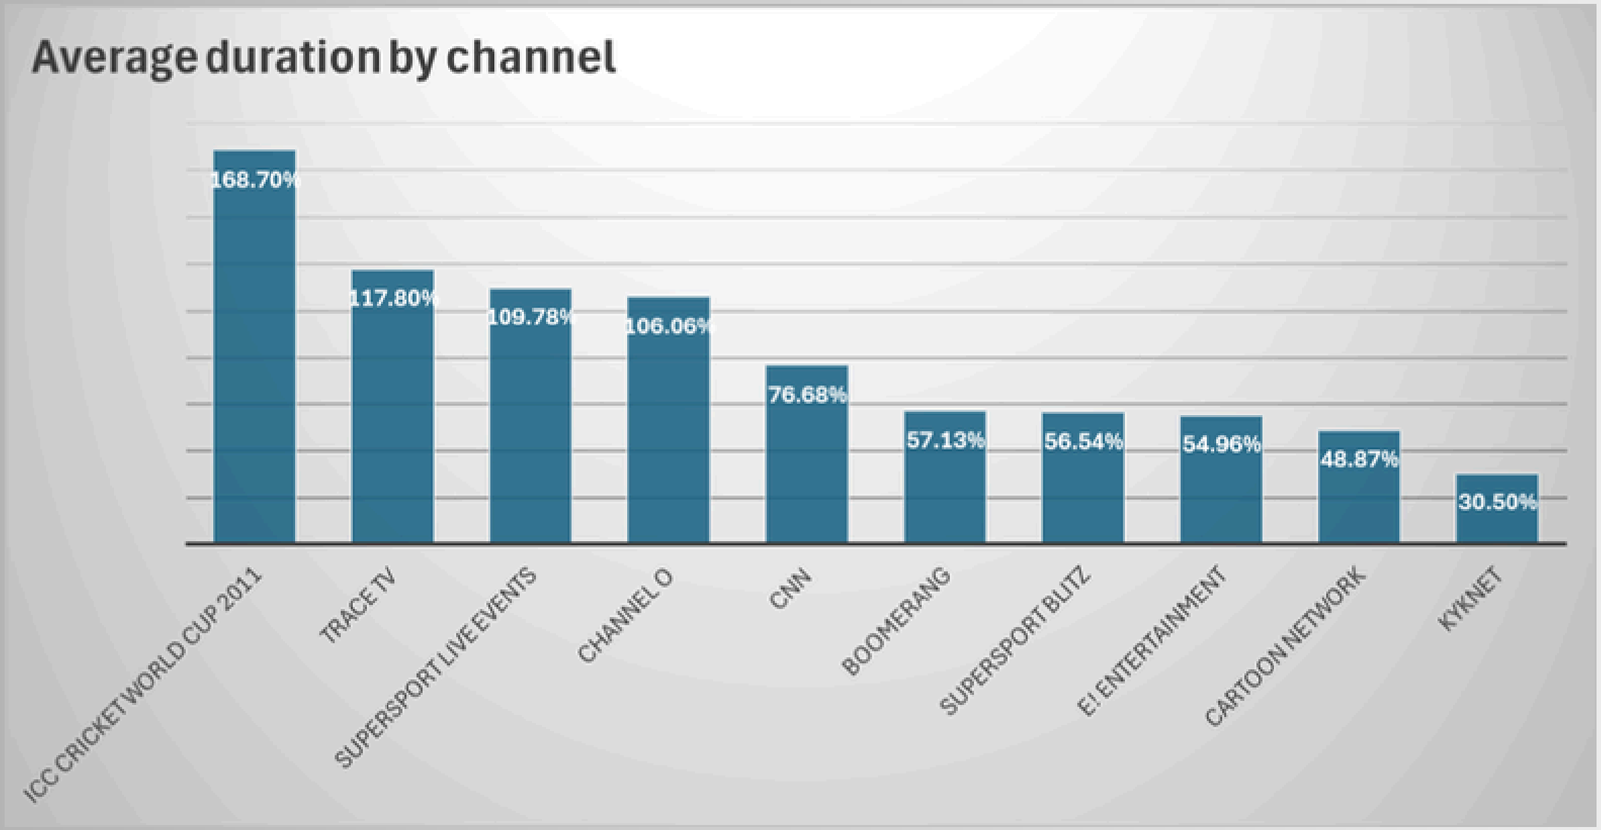
Channel preference Across Key Demographics



Active viewership is highly concentrated in sports, with SuperSport Live Events leading across all provinces (40% overall), particularly in Western Cape and Eastern Cape. ICC Cricket World Cup 2011 shows strong regional spikes, notably in Limpopo (51.86%) and unknown locations, while Channel O remains a secondary but regionally relevant entertainment option, strongest in Northern Cape. This underscores sport as the primary engagement driver, with clear provincial content preferences.

Channel preferences are strongly driven by sports content, with SuperSport Live Events and ICC Cricket dominating across most demographic groups and provinces, particularly in Western Cape, Eastern Cape, and Limpopo. Gender and racial patterns show differentiated engagement, with males and Indian/Asian audiences more aligned to sports viewing, while entertainment channels like Channel O demonstrate stronger localized appeal in select regions. Overall, sports is the primary cross-demographic engagement driver, with clear provincial variations highlighting opportunities for targeted regional content strategies.

Average Duration on channel watched



Sports and event-based content drive the longest viewing durations, led by ICC Cricket World Cup 2011 and SuperSport Live Events, indicating high engagement and stickiness. In contrast, entertainment and kids' channels show shorter average durations, suggesting lighter, more casual viewing patterns.

Insights & Recommendations

1. **Insight: Sports content is the dominant driver of engagement across channels, demographics, and regions, led by SuperSport Live Events and ICC Cricket.**

Recommendation: Invest in sports rights and live event content as the primary lever for acquiring and converting new subscribers.

2. Insight: Viewership is highly time-bound, peaking in the evening and mid-to-late week, with clear low engagement on Mondays and late nights.

Recommendation: Align content scheduling to peak periods and introduce targeted programming to boost low-engagement slots (especially Mondays).

3. **Insight: Engagement is concentrated among young adults and key provinces, but significant “unknown” demographic data limits full audience understanding.**

Recommendation: Improve user profiling and data capture processes to enhance targeting, personalization, and conversion strategies.
